

# Selena wanted to turn back time

## ...just a little

### SELENA'S STORY

"I had become particularly bothered by the sense of looking constantly tired. The lines around my mouth and eyes were becoming ever more deeply etched, add to that the 'slippage' factor, (where my face seems intent on heading south a little faster each year), taking with it volume from my cheeks and lips, it's little wonder when looking in the mirror I was confronted with a tired and worn looking me. Maintaining a natural look and budgeting costs were a priority.

"The essential first step was finding a professional, qualified team of cosmeceutic experts. ICCM proved wonderfully supportive, managing my expectations and providing me with a specifically tailored rejuvenation program. To assist in managing the cost, we implemented the plan over a 6 month period."

### THE TREATMENT

**Fat Transfer:** this involved taking fat from my thigh and using it to plump up my cheeks and the deep grooves that run from my nose to my mouth. This amazing procedure has restored vitality to my face.

**Injectable Wrinkle Treatment:** restored the delicate skin around my eyes and mouth and minimised my deep frown lines.

### SECOND VISIT TO ICCM

**Thread Lift:** the aim - to tighten and lift the skin on my mid face area and lips. This is a minimally invasive procedure performed under local anaesthetic and often called 'the non-surgical face lift'.

"I am ecstatic with the results of my treatment and grateful for the ready access to the broad knowledge and professional expertise provided by the team at ICCM!"

**Styling:** to complete the transformation, stylist Ronnie Baroutha enhanced her natural red locks with a style cut and highlights.

### THE RESULTS

Looking at least 5 years younger. Selena is once again turning heads.

### WHAT IT COST

Fat Transfer \$3000  
Thread Lift \$4800  
Wrinkle Treatments \$750  
Dermal Fillers \$660
